New bill in U.S. Senate will advocate adoption of “agrichar” method that could lessen our dependence on fossil fuel and help avert global warming.

Ten Years Later, AIDS Vaccine Search Continues

Science gets closer, but a fully effective vaccine remains elusive.

Special Report: Inspired by Ancient Amazonians, a Plan to Convert Trash into Environmental Treasure

New bill in U.S. Senate will advocate adoption of “agrichar” method that could lessen our dependence on fossil fuel and help avert global warming.
FEATURES

GAMES THEORY
The Traveler’s Dilemma
When playing this simple game, people consistently reject the rational choice. In fact, by acting illogically, they end up reaping a larger reward—an outcome that demands a new kind of formal reasoning.

INFORMATION TECHNOLOGY
Breaking Network Logjams
Network coding could dramatically enhance the efficiency of communications networks.

ECOSYSTEMS
$ Restoring America’s Big, Wild Animals
Pleistocene rewilding—a proposal to bring back animals that disappeared from North America 13,000 years ago—offers an optimistic agenda for 21st-century conservation.
PARTICLE COSMOLOGY
$ When Fields Collide
The history of particle cosmology shows that science can benefit from wrenching changes

BIOLOGY
$ A Simpler Origin for Life
Energy-driven networks of small molecules may be more likely first steps for life than the commonly held idea of the sudden emergence of large self-replicating molecules such as RNA.

INNOVATIONS
$ Seeing Triple
Anticipated for decades, machines are finally displaying real objects in three true dimensions

MEDICINE
$ Lifting the Fog around Anesthesia
Learning why current anesthetics are so potent and sometimes dangerous will lead to a new generation of safer targeted drugs.

NEWS SCAN
$ "Memjet" Momentum
Ink-jet printing at ramjet speed
$ Silicon Smackdown
New Go algorithm aims to depose humans
$ Atomic Fingerprinting
Microscope discerns an atom's chemical identity
$ Green Gold in a Shrub
Entrepreneurs target the jatropha plant as the next big biofuel
$ Beam Weapons Get Real
Solid-state lasers near battlefield deployment
$ Dumb Cup
Recipe for a steaming cup of something
$ Fish That Go Skin-Deep
Trapped fish adapt to a life of nibbling on humans
$ A Good Turn
A fish-friendly hydroelectric turbine gets new life

IN BRIEF
$ News Scan Briefs

INSIGHTS
Going beyond X and Y
New genetic studies, Eric Vilain says, should force a rethinking about mixed-sex babies and gender identity

SA PERSPECTIVES
Serengeti in the Dakotas
Serengeti in the Dakotas

SKEPTIC
The (Other) Secret
The inverse square law trumps the law of attraction

WORKING KNOWLEDGE
$ The Write Type
Optical character recognition finds the write type

ANTIGRAVITY
Dumb Cup
Coffee cup full of beans

SUSTAINABLE DEVELOPMENTS
Climate Change Refugees
As global warming tightens the availability of water, prepare for a torrent of forced migrations
